

Aspen James

206-290-2148 | aspenjames@tqca.org | [GitHub](#) | [Blog](#) | [LinkedIn](#)

Full-stack developer specializing in Ruby on Rails, JavaScript, React, and Redux. I enjoy hunting for and fixing bugs, fixing system/environment issues, and simple applications. My background is in coffee, customer service, and training, which has helped me cultivate a strong attention to detail and effective interpersonal skills. My natural curiosity and interest in continuous learning have driven me in the pursuit of ongoing advancement of my programming education. In my free time, I enjoy learning new programming languages, finding (or building) terminal-based alternatives for graphical applications, hiking, and tinkering with various computer hardware and operating systems.

TECHNICAL PROJECTS

Portfolio Site - [GitHub](#) | [Deployed](#)

Personal portfolio website

- + Built with [Ruby on Rails](#)
- + Uses [HTML](#), minimal [JavaScript](#)
- + Deployed to [Linode](#), served via [Apache2](#)
- + Uses [Kramdown](#) to parse Markdown to HTML

Tknbn - [Github](#)

A terminal-based kanban board

- + Development on pause
- + Built using [Ruby](#)
- + Text display built using [Curses](#)
- + [SQLite3](#) for data storage
- + [Blog series](#) written on development process

Espresso.log [Github](#) | [Demo](#)

Web app for coffee shops to organize and track their espresso data

- + Utilizes [React/Redux](#) front-end framework
- + Client-side routing handled by [React Router](#)
- + [PostgreSQL](#) database with a [Rails API](#) backend
- + Integrates [Canvas.js](#) for data visualization

Data Structure Implementations - [Github](#)

Implementations of various data structures

- + Examples currently in [Ruby](#) and [JavaScript](#)
- + JavaScript tests using [Mocha.js](#) and [Expect.js](#)
- + Ruby tests using [RSpec](#)
- + Follows [TDD](#) (Test Driven Development) principles

TECHNICAL SKILLS

Proficient: Ruby on Rails, JavaScript, React, Redux, Linux, SQL

Self-directed Learning: Go, Python, Rust

EMPLOYMENT HISTORY

Rover.com, Seattle, WA

Software Engineer I, Sept 2019 - Present

- + Full stack developer on New Business Lines
- + Participated in Agile workflow, including estimation, retro, writing tickets
- + Provided feedback on design and implementation plans for new features
- + Identified and filled gaps in internal documentation
